Alexandria, VA 22313-1450

1. I am the named inventor on the above-encaptioned patent application.
2. Attached as Exhibit A is a sample of a towel product made according to the claims of the present application. The two blue layers are made from split microfiber product and there is a terry cloth fabric in between the two split microfiber layers. The product is not sewn completely around the periphery of the towel so that the layers can be peeled back and examined. In the actual product, the peripheral edge would be sewn together.
3. Attached as Exhibit B is a fabric sample obtained from Milliken Corporation. It is my understanding that the attached sample was sent to the librarian at the North Carolina State University College of Textiles in response to an inquiry to Milliken about the fabrics described in the DeMott patent, U.S. Patent No. 6,770,581.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these
